Noida, Uttar Pradesh

Education

B.Tech in Data Science

(2020 - 2024)

Maharishi University of Information Technology - Noida

Academics

Delhi Public School Kashi

- 12th Grade - 77%
- 10th Grade - 82%

Skills

- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn)
- **Databases:** MySQL, MongoDB, SQLite
- **Data Processing:** Data Cleaning, Manipulation, Transformation, Error Handling
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **Tools & Technologies:** VS Code, Jupyter Notebook

Hobbies

- Played Basketball at National Level
- Enjoys Watching Movies & Exploring Tech Trends

Projects

Banking Automation System

(Python + SQLite)

- Developed an automated banking system with account creation, transactions, and balance tracking.
- Ensured secure transactions using **advanced data validation techniques**.

Restaurant Billing System

(Python + SQLite)

- Built an efficient billing system for restaurant order processing.
- **Integrated database features** for order tracking and bill generation.

Sachin Tendulkar ODI Data Analysis

(Pandas, Matplotlib, Seaborn, Power BI)

- Analyzed Sachin Tendulkar's ODI performance **using statistical methods**.
- Created visualizations showcasing key performance trends.
- Designed an interactive **Power BI dashboard** for deeper insights.

Pizza Sales Analysis

(MySQL, Power BI)

- Extracted insights on top-selling items, customer demographics, and sales trends.
- Provided data-driven recommendations to boost revenue.
- Two more similar projects of **Global Mobile Analysis** and **Pre-Owned cars Analysis**

Internships

Business Analyst Intern - Velocis Systems Private Limited

March 2023 - May 2023

- Assisted in data-driven decision-making and business intelligence solutions.
- Worked on data extraction, visualization, and reporting using Power BI.

- **I have completed a fully certified course of Python 101 With data science from congestiveclass.ai.**
